

Tanuja Tukaram Jadhav

DevOps Engineer

☎ (+91) 9579829434 | Pune, India | ☎ jtanuja1306@gmail.com

PROFILE SUMMARY

DevOps Engineer with over two years of experience specializing in CI/CD pipeline orchestration, cloud infrastructure, and automation. Deployed scalable, containerized applications using AWS, Docker, Kubernetes, and Terraform, demonstrating proven expertise and delivering robust cloud solutions. Demonstrated methodical application of Infrastructure as Code (IaC) principles and developed robust automation workflows using Python, Shell, and PowerShell scripting. Experienced in managing full-cycle software delivery, version control, and Agile workflows integrated with Jira and SQL. Enhanced system reliability, accelerated release cycles, and improved operational efficiency by implementing continuous integration and deployment strategies.

KEY SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, VPC, Subnet)
- **CI/CD & Automation:** GitHub Actions, GitLab CI/CD, Terraform, Shell Scripting
- **Containers & Orchestration:** Docker, Kubernetes
- **Version Control & Collaboration:** Git, GitLab, GitHub, Jira Integration
- **Programming & Scripting:** Python, Shell Scripting, Batch scripting, PowerShell, C, C++, Java
- **DevOps Practices:** Infrastructure as Code, Event-driven Automation
- **Other Tools:** SQL, AWS CLI

PROFESSIONAL EXPERIENCE

DevOps Engineer | KPIT Technologies

April 2024 – Present

- Designed, implemented, and maintained CI/CD pipelines using GitHub Actions and GitLab CI/CD to automate software build, validation, and release workflows.
- Containerized applications and CI environments by creating and maintaining Docker images, ensuring consistent, scalable build and deployment workflows.
- Developed reusable automation solutions using Bash, Python, PowerShell, and Batch scripting to streamline development and operational processes.
- Integrated code quality, artifact management, and release automation into CI/CD pipelines to improve deployment speed and enhanced overall software quality.
- Configured and managed AWS services including EC2, IAM, VPC, S3, Security Groups, Route Tables, and AMIs.
- Managed Git repositories, including branching, pull requests, rebasing, merging conflict resolution, code reviews, and releases.
- Monitored and optimized CI/CD pipelines to improve reliability and continuous delivery.
- Collaborated with cross-functional Agile teams to deliver automation and DevOps solutions.

PROJECTS

Project: HONDA DPG (Automotive Domain)

- Automated software delivery using GitHub Actions CI/CD pipelines for application build, testing, JFrog artifact publishing, and release workflows.
- Built a configurable automation framework using Bash, Python, PowerShell to streamline build execution, dependency validation, and multi-project workflows
- Developed a reusable GoogleTest automation framework for test execution, validation, and automated report generation.
- Resolved a complex automation challenge by designing a reusable code coverage workflow with seamless CI/CD pipeline integration.
- Improved code quality by integrating SonarQube on AWS with automated analysis and quality gate enforcement.
- Created and maintained Docker images to standardize build environments and ensure reproducible CI/CD execution.

Project: Caterpillar Gen7 – Virtualization

- Built Docker-based Software-in-the-Loop (SIL) environments to standardize application execution and validation.
- Developed a GitLab Actions CI/CD pipeline to automate environment provisioning, validation workflows, and report publishing.
- Developed Batch scripts to automate application build, test execution, environment configuration, and report generation.
- Automated virtual environment provisioning and test bench setup, enabling reliable validation and seamless CI/CD integration.

TECHNICAL ACHIEVEMENTS

- Orchestrated streamlined deployment processes to accelerate software delivery and reduce manual effort across multiple environments.
- Built containerized environments and reusable scripts to ensure consistent execution and reliable quality validation across projects.

AWARDS & RECOGNITION

- KPIT - Highflyer Award - Recognized for advanced scripting and high-test coverage, improving system reliability.
- KPIT - Highflyer Award - Acknowledged for ownership and collaboration in improving CI/CD workflows and tooling.

CERTIFICATIONS

- Kubernetes for the Absolute Beginners
- Ultimate AWS Certified Cloud Practitioner (Udemy)

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

Genba Sopanrao Moze college of Engineering, Pune | Expected 2027 | CGPA: 8.24/10

Diploma in Computer Engineering

Ashokroa Mane Polytechnic, Kolhapur | Completed 2023 | Grade: 88 %
